## Tasting Notes & Food Pairings

Our ciders are delicious on their own or paired with different foods.

Crisp **Private Bin** is perfect as an aperitif, served with charcuterie, olives and hard cheeses. Add a dash of Aperol and serve in a champagne flute for a fantastic British Spritz – The Charrington's Britz!

**Cryals Classic** (overall Q Award Best Cider Winner) is the ideal accompaniment to roast pork, your favourite spicy dishes and desserts. Our **Earl's Reserve** is highly versatile, ideal on the bar or for picnics and festivals in summer, while in winter it can be warmed and mulled with our **Red Peppercorn & Hibiscus** mulling spices.

We have four single variety juices, different but all equally delicious with only naturally occurring sugars. And they're not just for drinking - splash into sauces, stews, or even add to fruit cakes and crumbles.

**Captivating Cox** – a refreshing perfectly balanced juice, and **Ravishing Russet** – a velvety smooth sweet juice are our flagship varieties supported by our limited edition **Cheerfull Gold™** and **AmaZing Zari** juices.

All are healthy additions to the table and celebrate Kent's finest apple growing tradition and expertise. Freeze to make deliciously healthy lollies or slushes for the kids in summer or use as mixers in cocktails for the grown-ups, such as berry flavoured gins with Captivating Cox or Toffee Vodka in Ravishing Russet.

## Environmentally Sustainable

We're accredited by Red Tractor & LEAF (Linking Environment & Farming) - the highest accreditation for sustainable farming in the UK and globally recognised. All our products are packed under BRC or Salsa.

Long term ethical farm strategy for waste avoidance: sustainable diversification to "make every apple count".

Our miles of protective wildlife corridor hedgerows, wildflower enriched headlands and tree filled apple orchards, our focus on regenerative sustainable horticulture, our prunings mulched and returned to the orchard every year, our solar panels on our stores, rainwater collection on every building...all form part of our ongoing mission to protect our environment, grow responsibly and be givers, not takers as net contributors to maintaining a clean water table and moving from being carbon neutral to carbon positive.

We want every delicious apple we grow to be loved for their taste and play their part in our nation's food security.

All taste, no waste!
